

# MICRO RAPTOR

Sweden's First Metallic  
Silhouette System!

Based on the CZ 457

# MICRO RAPTOR

Based on the CZ 457, with the ability to change barrels in its foundation, F&V has now created something that the market has lacked.

Our Micro Raptor is available in two barrel lengths, Production 9¼" and Unlimited 15", with the option to buy barrels and stocks even for rifles.

The sight radius is maximized for what each silhouette discipline allows.

The Unlimited and Production barrels come in caliber -  
- .22LR

Rifle barrels are available in the following caliber:

- .17HMR
- .22LR
- .22WMR

# MICRO RAPTOR

Our innovative quick mount, for the rear sight, enables the shooter to have different sets of sight/notch widths for each barrel.

The Micro Raptor is also equipped with adjustable front post, where both height and width can be adapted to the shooter's advantage.
